

I am writing in response to the proposed changes that would destroy the ability of KLOVE radio to continue to reach cities throughout the United States, including Alaska because of low voltage stations interference and override of their broadcasting signals - KLOVE is a commercial free Christian radio station and I am a partner that pledges \$50 a month to enable them to operate as they have for the past 22 years reaching the homes, offices and cars of millions of listeners like me - there is already major interruption of their signal from other broadcasters who are using call signals just next to theirs on the radio dial - some deliberately in order to take away listeners - my life and community is far better because of KLOVE and the impact it has on children as well as adults in providing positive encouraging upbeat music, thought provoking moments and news- because I contribute to continue this type of broadcasting it should not be taken away by smaller stations or your committee's decisions - try it for yourself - you will find it will change the atmosphere in your home, office or car - please listen online at klove.com - check out the news page and other links to see the overall Christian ministry that you will disrupt if you continue with your plan- thank you Respectfully Submitted Kathleen Campbell
